

New!

PLUG'N'GROW's iGS-220 U

*Convert your iGS-220 into an iGS-221
and get a controller able to manage
ALL indoor garden's climate parameters!*

Take advantage of
PLUG'N'GROW's
outstanding
products:

Reliable

Built to last

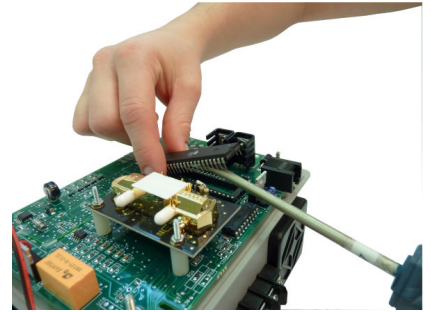

Easy to use

Guaranteed
for 3 years

Also take advantage
of **PLUG'N'GROW's**
skilled technical
support team
available
7 days a week!

It's easy!

Get an iGS-221
just by replacing the
microcontroller
of your iGS-220!

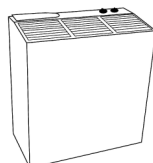

The iGS-220 upgrade kit includes:

- 1 microcontroller
- 2 iGS-25
- 1 connection module
- 3 Ethernet cables (RJ45)

The iGS-221

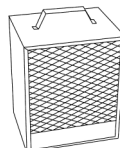

- Intelligently manages 6 actions: CO₂ enrichment, venting, humidifying, dehumidifying, heating and cooling.
- Prioritizes actions according to a logical sequence; allowing the plants to keep their stomas opened for an optimal CO₂ absorption!
- Feeds up to 45 amps of controlled equipments (110-120V; 3 separate circuits needed).
- Provides automatic differential for precise CO₂ concentration control.
- Ready to use, just adjust your set points!
- Offers a 24 hours log to know your garden's conditions.
